**IRON GATE RECORDS APPOINTS KEY PERSONNEL**  
**IRON GATE RECORDS BUILDING TEAM TO SUPPORT ARTIST ROST**

NASHVILLE, TENNESSEE – Iron Gate Records announced the appointments of several key positions to assist the label in developing its artist roster and supporting those artists. These key roles will help the label to develop additional capabilities to build upon in addition to existing leadership and technology innovation.

Mark A. Skoda stated, “I have been working with Tod Turner, the CEO of Intercept Music for several years as they have grown their technology platform. In forming Iron Gate Records, I shared that vision with Tod and Intercept and discovered that they had recently launched applications for independent record labels to manage their artists. As we discussed my business vision and the previous work we had done with Intercept, to include distribution through Ingrooves Music Group, it was clear to me that a strategic partnership was in the offing.”

Iron Gate Records will incorporate the technology backbone of Intercept Music to deliver services to its artists. In addition to taking advantage of the current set of services, the label will be able to integrate future offerings that Intercept will deploy in the coming weeks and months.

CEO of Intercept, Tod Turner stated, “We are excited to be working with Mark and Iron Gate Records. As we developed our technology platform for artists, it became clear to us that we could build a record label integration that would allow independent labels to manage a roster of artists efficiently. Having worked with Mark early on, we were excited to hear of the launch of Iron Gate Records and partnering to provide that same technology to this new label and artists.”

Iron Gate Records and Intercept Music will work together to integrate their service offering into the artist support capabilities of Iron Gate Records. Intercept Music will provide a point of differentiation for Iron Gate Records in developing an efficient capacity to serve those artists while building on the development and future offerings of Intercept as a technology leader.
